

Guide: Ouriginal for MS Teams

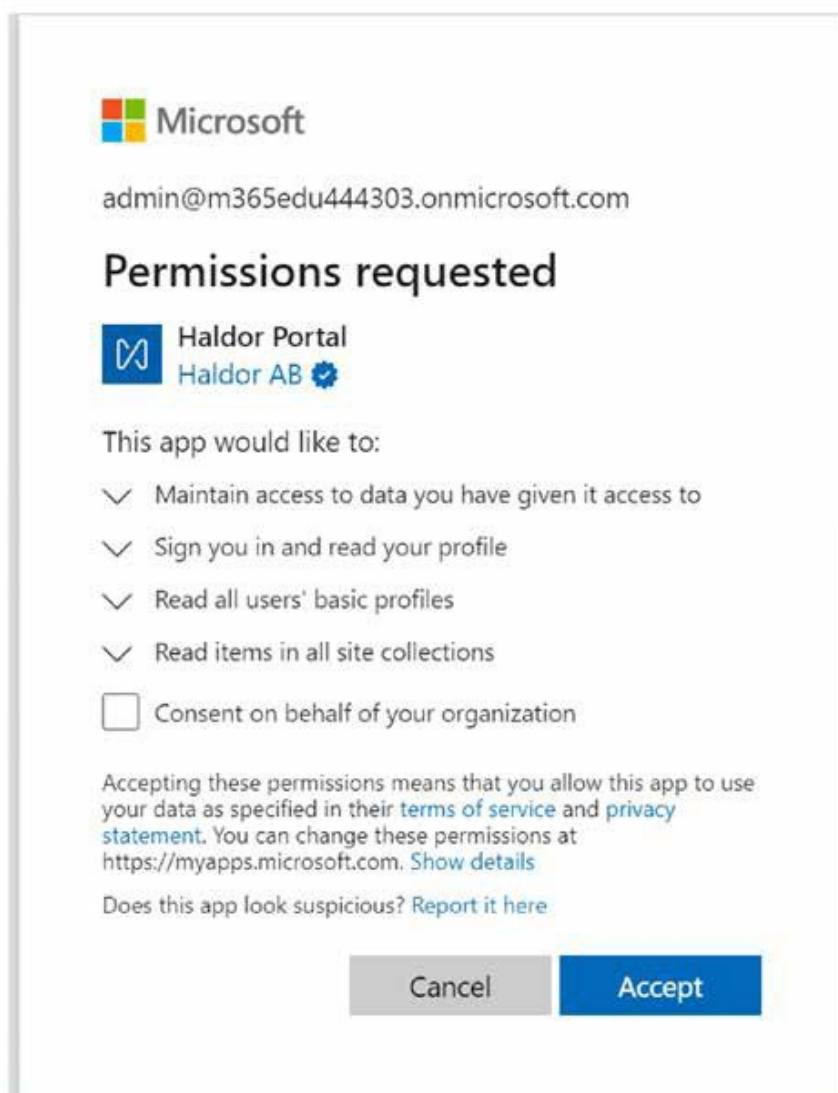

Introduction

This document shows how an administrator approves the Urkund application, and subsequently how to install and use the application.

Administrator - Approve application

A Global Admin in Office 365 must approve the application in your tenant.

- Log in at <https://ouriginal.haldor.se> using your Microsoft account.
- The first time you log in as a Global Admin you have to approve the portal's access to your information. By accepting the permissions the portal is able to obtain the needed basic information about you and the tenant.

- Click on 'Consent to Ouriginal' to approve the application.

Welcome to Haldor!

Bruno, we are excited to have you onboard!

Original/Urkund (Plagiarism checker)

The Plagiarism checker allows you to check documents in assignments submitted by your students for plagiarism. You can view the status of these documents directly within the tab. Powered by Ouriginal and Haldor.

Click on 'Try' below to register our app with your tenant, and send Urkund Sales an email at sales@ouriginal.com. We need to set up your account for testing with an Ouriginal account.

Since you have to have an account with Ouriginal to use this fully, contact Ouriginal Sales at sales@ouriginal.com so we can set up your Ouriginal-account with the integration.

If you are a Global Administrator of your Office 365 tenant, you can consent to this application here.

[Consent to Ouriginal/Urkund \(Plagiarism checker\)](#)

If you are not a Global administrator, please send an e-mail to your administrator from this page. The admin will get an email with information about what to do. You will be able to see the information sent to your administrator and also add your own message.

[Send an email about this application to an admin](#)

- Click on "Grant permissions"

The action you are trying to perform needs additional permissions.

Consenting to applications need to be done by an administrator. This includes giving the portal access to some data to be able to configure the services. We are not able to see if you are an administrator, so if you are not, you will get an error when trying to proceed with this account. On the next screen, you will be able to log in with another account if you need to.

The specific service that you are trying to consent is going to need two consents. They will appear as consent-screens when you continue.

1. **Permissions for the portal** - This is needed for service configuration.
2. **Permissions for the service that you want to use** - This is needed to run the service.

You will be **signed out** after clicking the button to refresh your cached grants.
When you get back to the action-page, please retry the action!

[Grant permissions](#)

- You will be asked to log in again. It is important that you log in using the same Microsoft-account as you used before (assuming you are a global admin).
- Click Accept.

admin@m365edu444303.onmicrosoft.com

Permissions requested Review for your organization

This app would like to:

- ✓ Maintain access to data you have given it access to
- ✓ Read and write to all app catalogs
- ✓ Read users' view of the roster
- ✓ Read organization information
- ✓ Read items in all site collections
- ✓ Sign in and read user profile
- ✓ Read all users' basic profiles

If you accept, this app will get access to the specified resources for all users in your organization. No one else will be prompted to review these permissions.

Accepting these permissions means that you allow this app to use your data as specified in their [terms of service](#) and [privacy statement](#). You can change these permissions at <https://myapps.microsoft.com>. [Show details](#)

Does this app look suspicious? [Report it here](#)

Cancel

Accept

- After logging in, a new approval box will appear. This time to approve the application. Click Accept.

admin@m365edu444303.onmicrosoft.com

Permissions requested Review for your organization

This application is not published by Microsoft or your organization.

This app would like to:

- ✓ Sign in and read user profile
- ✓ Maintain access to data you have given it access to
- ✓ Access directory as the signed in user
- ✓ Read users' class assignments and their grades
- ✓ Read users' view of the roster
- ✓ Read all files that user can access
- ✓ Read all OneNote notebooks that user can access
- ✓ Sign in and read user profile
- ✓ Read all users' basic profiles

If you accept, this app will get access to the specified resources for all users in your organization. No one else will be prompted to review these permissions.

If you accept, Haldor Plagiarism API will also have access to your user profile information.

Accepting these permissions means that you allow this app to use your data as specified in their terms of service and privacy statement. **The publisher has not provided links to their terms for you to review.** You can change these permissions at <https://myapps.microsoft.com>. [Show details](#)

Does this app look suspicious? [Report it here](#)

- Once approved, the administrative part of the process is completed.

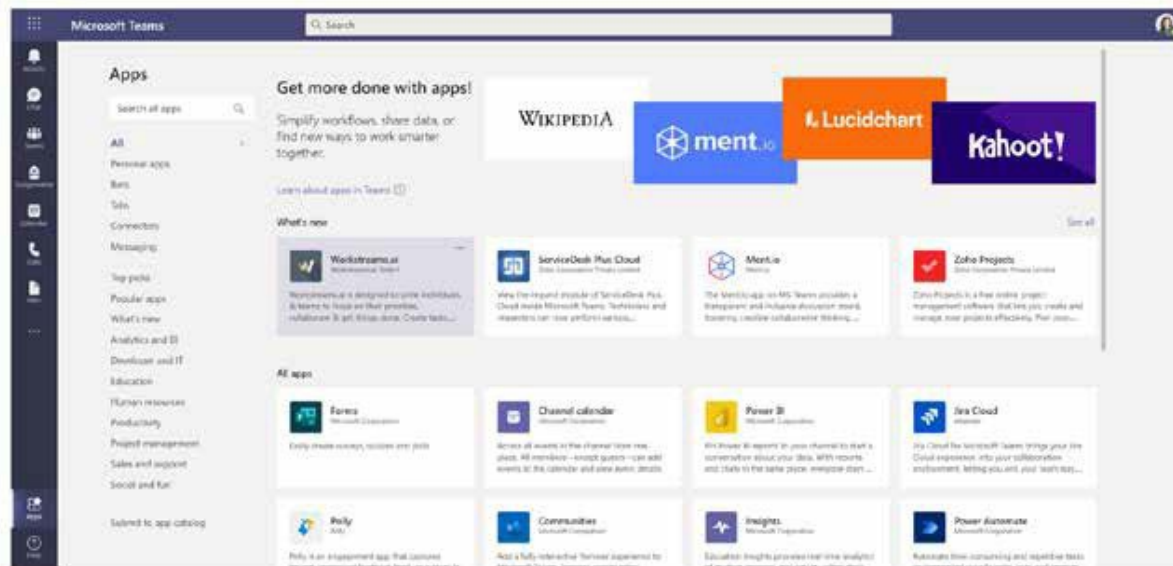

support@haldor.se.

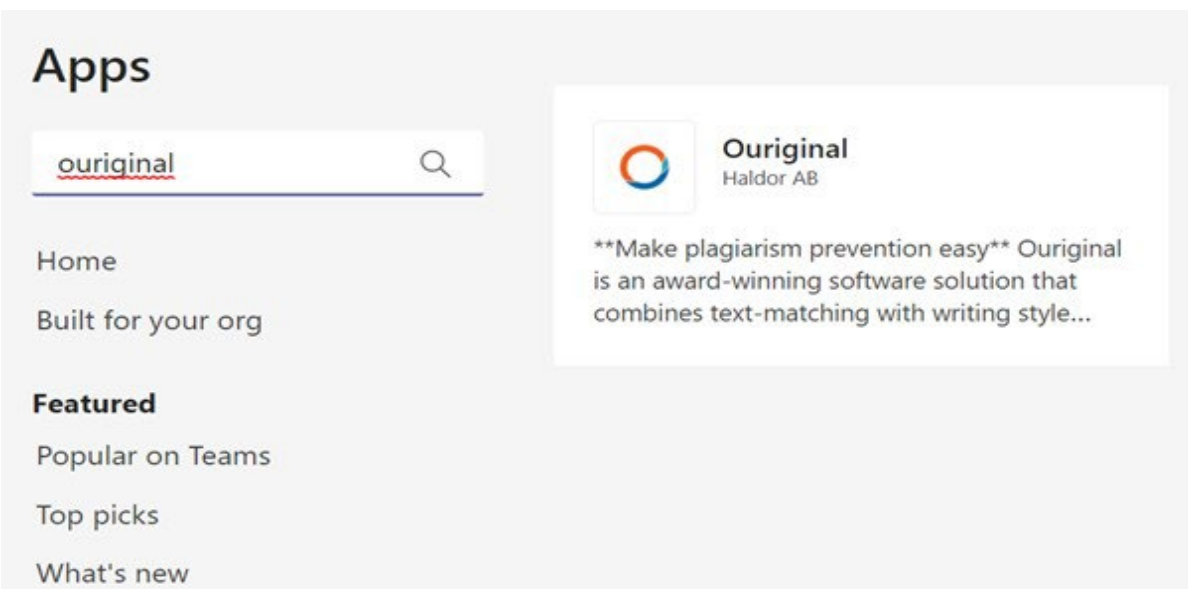

User-Install application

The Ouriginal application is a Teams tab and is installed for a team.

- Click "Apps" located in the lower left corner of Teams.

- Use the search function and search for "Ouriginal".
- Click the Ouriginal-icon.

- Click "Add to a team".

[About](#) X

****Make plagiarism prevention easy**** Ouriginal is an award-winning software solution that combines text-matching with writing style analysis, enabling educators and users to assess the authenticity of any text. It helps create an environment that fosters fairness and sparks creativity among students, facilitating personal development by unlocking their full potential. Ouriginal is a fully automated software that searches through three major source areas that are then matched against the uploaded document. These sources include previously uploaded documents, publishers' content as well as the internet. The results of the Ouriginal analysis is then presented in an interactive report along with further details and explanations. Once you receive the report, you can assess whether plagiarism has occurred or not by evaluating the findings. The report will be sent to you directly in Microsoft Teams or via email. Ouriginal allows you to be flexible and adapts to your preferred way of working so that you can use the service the way it feels most practical to you. With the integration to Teams, you will be able to check all the normal types of files, and also Class Notebooks (OneNote). The integration is developed in partnership with Haldor. Your school need to have an active license with Ouriginal to use the application. To get started, send a request from the Teams Store or contact Ouriginal directly at sales@Ouriginal.com. An administrator needs to consent the application before it can be used. Contact Ouriginal (sales@Ouriginal.com) to get further instructions. The integrations works for EDU tenants.

How to use the Ouriginal integration in Teams

- When the Ouriginal tab is in place in your team, simply click on the tab to access the application.
- If you have created an assignment in Microsoft's Assignments and students have submitted their work, those submissions will appear.
- The teacher can choose to share the Ouriginal analysis report with the students using the button.

- The assignments are listed in chronological order. Click on one of the assignments to see the student's submitted assignments.

- Submit one or more documents for analysis by selecting the document(s) and clicking "Submit for control". The status of the document is then set as "Sent". The analysis of a document usually takes between 5 to 15 minutes. The status does not change in real time.

Troubleshooting - Error Messages

If the configuration of your integration between Office 365 and Ouriginal is not complete, you might receive an error message while trying to install the application in a tab in your team.

"No school is registered" - The most likely error message you will see is that there is no school is registered. This means that no configuration had been made for your account or that there is no connection between your school and Ouriginal. If there are schools in the drop-down list, then choose your school and continue. If there are no schools in the list, or if your school does not appear in the drop-down list, please contact your administrator or email support: support@ouriginal.com.

"Too little text" - For a document to be analysed, a certain amount of text is required. If you do not reach that limit, you will get the error message "Too little text to be analysed".

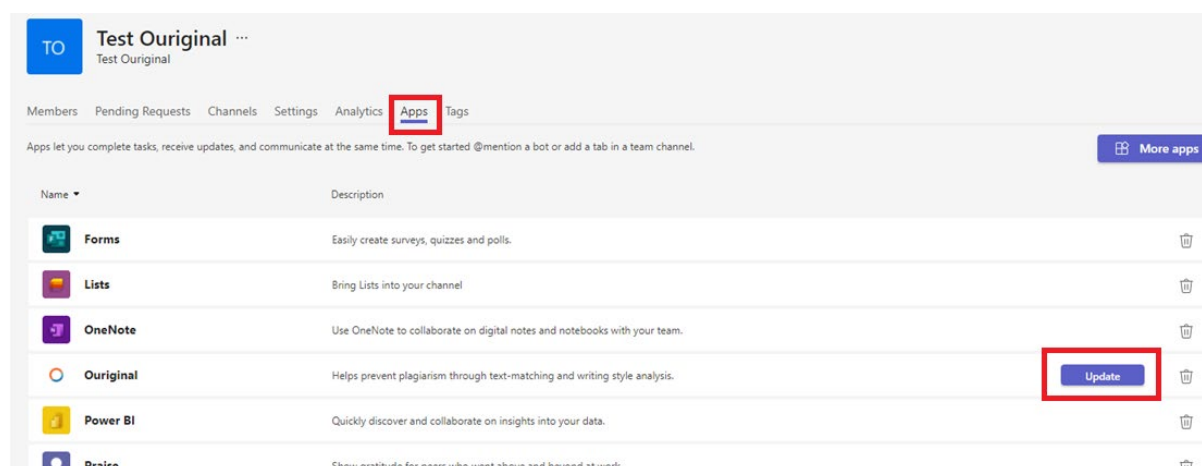

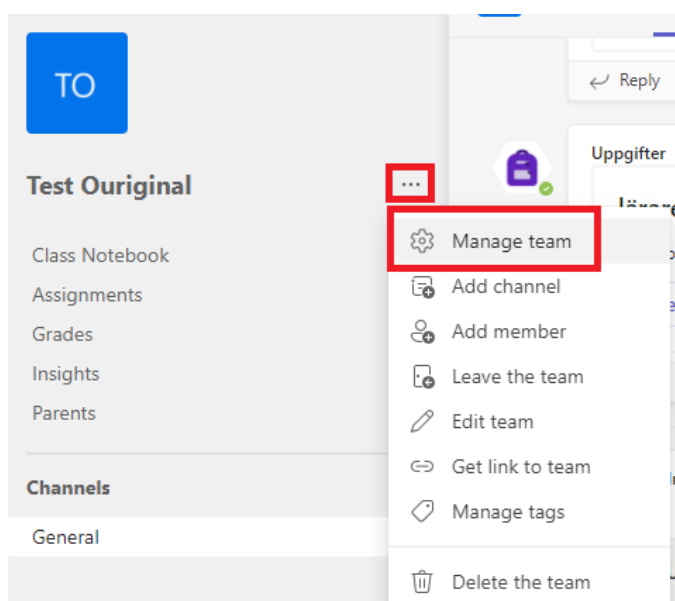

"File type not supported" - You may also receive an error message that the file type is not supported. However, please note that the most common file types are supported. Even ClassNotebook/OneNote if you include pages from it in the assignment.

Update to the integration: February 2022

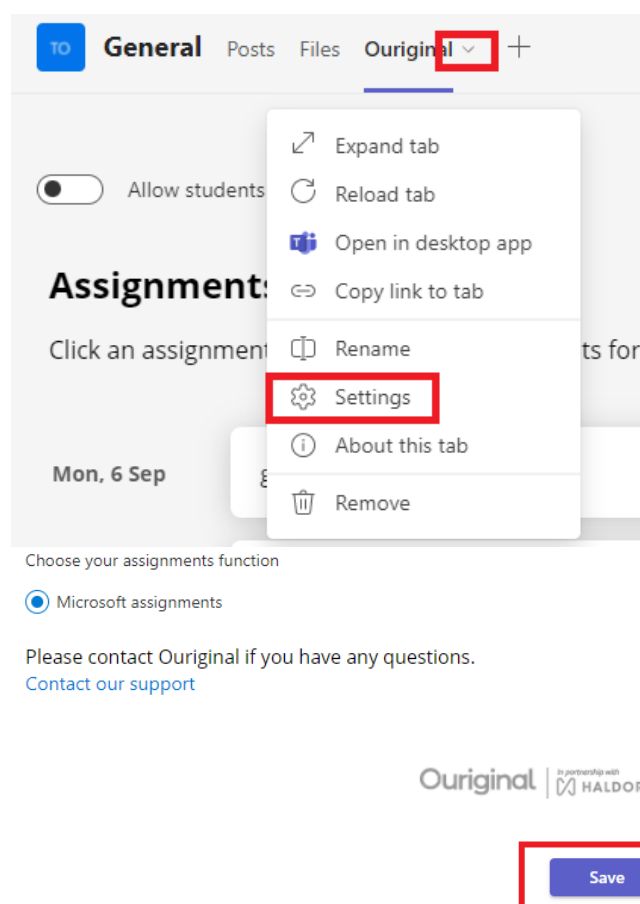

The Teams integration has been updated recently and you can upgrade to the latest version of the app by going in to "Manage team" and choosing "Update" on the "Apps" page.

The upgrade does not happen automatically and must be done by you as an owner of your team.

After you have updated to the latest version, you need to go into the Ouriginal app tab and update the "Settings". On the settings page, just click "Save".

When this is done, you should have the new version of the app.
